

## **CPT Code List for MPG Services**

### **What is a CPT Code?**

CPT stands for Current Procedural Terminology Code, which is used to describe medical procedures that a provider performs on a patient. These codes are issued by the American Medical Association.

### **How are CPT Codes Used?**

CPT codes are used to provide a standardized and accurate form of documentation and billing for medical services. If you are eligible for a diagnostic code, the CPT Code List for MPG Services is available in the Patient Corner on our website, as well as in your patient portal in Theranest.

You can use CPT Codes to verify out-of-network reimbursement with your health insurance. **It is the client's responsibility to verify their out of network benefits prior to the start of services.** All clients with paid balances will receive a monthly billing statement with the appropriate codes required for reimbursement.

## **Mental Health Services**
